

Creating a Better World

These books explore real-world scenarios of young change makers. They aim to inspire others to consider the world around them and look to actively create positive change.

Using one or all of these books for inspiration, explore meaningful ideas to create change in your classroom, school or great community. Utilising the books established double-page layout as a template, support students to create their own localised goals.

Creating a Better World

How can we create a better classroom, school or local community?

Use this template to consider ways to create positive change and help others.

On the next page design a picture that illustrates the positive change you are inspired to make and some ways to achieve it.

We will achieve this by...

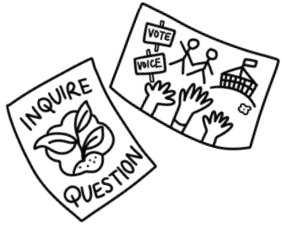

We are inspired to...

Our drawing will include...

A MoAD classroom-ready resource
